Important Information

Before requesting a Course Transfer: Please consider your request to transfer carefully. Students considering a course transfer are highly encouraged to seek **Course Guidance** prior to applying to transfer. Students who wish to transfer must first meet **all Eligibility Criteria** listed on the Course Transfer website before being assessed against the **Entry Requirements** listed here. If your course transfer application is successful, you may be placed into the current curriculum listed in the 2027 Course Handbook. Your academic standing will remain unchanged. Your WAM will be recalculated based on the grades from units completed in your previous course that are transferred and credited to your new course.

Transfers from a double degree to one of its constituent single degrees: If you are moving from a double degree to one of its constituent single degrees, you will generally be placed into the curriculum associated with your original admission year (not applicable to international student visa holders), unless the University determines otherwise*. As this is generally considered a continuation of your original admission rather than a transfer to a new course:

- Your WAM will generally remain unchanged.
- Your academic standing will remain unchanged.
- Eligible completed units from your double degree will continue to count towards the remaining single degree, subject to course requirements.

*Important exception: Students admitted in 2020 or earlier will not remain in their original curriculum when transferring from a double degree to one of its constituent single degrees. These students will be transitioned to the current curriculum and should review the relevant Course Handbook to understand any impacts on course requirements, credit outcomes and study progression.

Transfers to double degrees: Course transfer applications will only be considered where the requested double degree is offered in the current Handbook and is listed as eligible for transfer in these requirements. Students must meet the transfer requirements for each component of the double degree that they are not currently admitted to. For example:

- A student admitted to a Bachelor of Applied Finance seeking transfer to a Bachelor of Economics with Bachelor of Applied Finance will only be required to meet the transfer requirements for the Bachelor of Economics.
- A student admitted to a Bachelor of Arts seeking transfer to a Bachelor of Economics with Bachelor of Applied Finance must meet the transfer requirements for both the Bachelor of Economics and the Bachelor of Applied Finance.
- A student admitted to one double degree seeking transfer to another double degree must meet the transfer requirements for any component of the new double degree that is not part of their current course.
