

Important Information

Please consider your request to transfer carefully. Students considering a course transfer can utilise **course guidance information** prior to applying to transfer.

Students who wish to transfer must first meet **all Eligibility Criteria** as listed on the Course Transfer website before being assessed against **Entry Requirements**.

Successful course transfer applications will result in students being transferred to the **newest curriculum** as listed in the **2024 handbook** and students will have a new WAM which will be calculated only from units undertaken within the new course. The academic standing for a student's previous course will be applied towards the new degree after transfer.

Transfers to double degrees

Students can apply for any combination of two single degrees, however, please note that not all single degrees are able to be combined. Chosen combinations will be reviewed for eligibility once applications are submitted.

Please note that the **Education double degrees** and the **Combined Bachelor Master** degrees cannot be combined with other degrees as they are already comprised of two degrees.

Students **must** meet transfer requirements for **any component of the double degree** that they are not currently admitted to. For example, a student admitted to a Bachelor of Applied Finance seeking transfer to a Bachelor of Economics with Bachelor of Applied Finance will only need to meet the requirement of the Bachelor of Economics. However, a student admitted to a Bachelor of Arts seeking transfer to Bachelor of Economics with Bachelor of Applied Finance must meet the transfer requirement for **both** Bachelor of Economics and Bachelor of Applied Finance.
